

STAYING WELL

Preventive Care Coverage

Wondering what preventive care your plan covers?

Our plans cover the kind of services that:

- Screen for serious conditions
- Prevent infectious diseases
- Help you stay well

Regence BlueShield of Idaho

WHAT YOU NEED TO KNOW ABOUT PREVENTIVE CARE

The federal health care reform law passed in 2010 requires insurers to cover specific preventive care services. We support that initiative. In fact, our plans already covered many preventive care services, as we have long believed that preventive care and early detection are key to the long-term health and well-being of our members.

This brochure explains who's eligible for preventive care and shows which services are available to you and the family members covered by your plan.

Who's eligible for these preventive services?

To be eligible for these preventive services, you must first be covered by an active Regence policy.

Benefits for federally required preventive services may not be available to members covered by "grandfathered" policies or retiree-only plans. Contact Customer Service by calling the phone number located on the back of your member card or use the Live Help chat feature on regence.com for more information.

Do preventive services require pre-authorization?

Yes. Some services require pre-authorization and must meet medical necessity criteria.

What preventive services are covered?

Regence follows government guidelines to determine which preventive services we cover.¹

These guidelines are updated periodically to reflect new scientific and medical advances. Also, current services could be revised and may have limitations. Benefits are subject to change. New recommendations must be implemented no later than the first plan or policy year that is at least one year after the recommendation's publication.

You can learn more details about these services at healthcare.gov, including recommended child and adolescent immunization schedules.

Your provider may order preventive services that are outside of the recommended government guidelines that Regence follows and may result in out-of-pocket costs for you.

What is the coinsurance/copy for these preventive services?

The services listed in this brochure will be paid at 100% (no deductible, coinsurance or copays) when you see preferred (Category 1), participating (Category 2) or in-network providers. Deductibles and/or coinsurance may apply when you see non-participating (Category 3) or out-of-network providers.

1. Evidence-based preventive guidelines are developed and validated by the following government entities: United States Preventive Services Task Force (USPSTF), Advisory Committee on Immunization Practices of the Centers for Disease Control and Prevention (CDC), and Health Resources and Services Administration (HRSA).

COVERED PREVENTIVE SERVICES
